ThoughtAI

NOTEBOOK

Write. Think. Learn.

THE PROBLEM

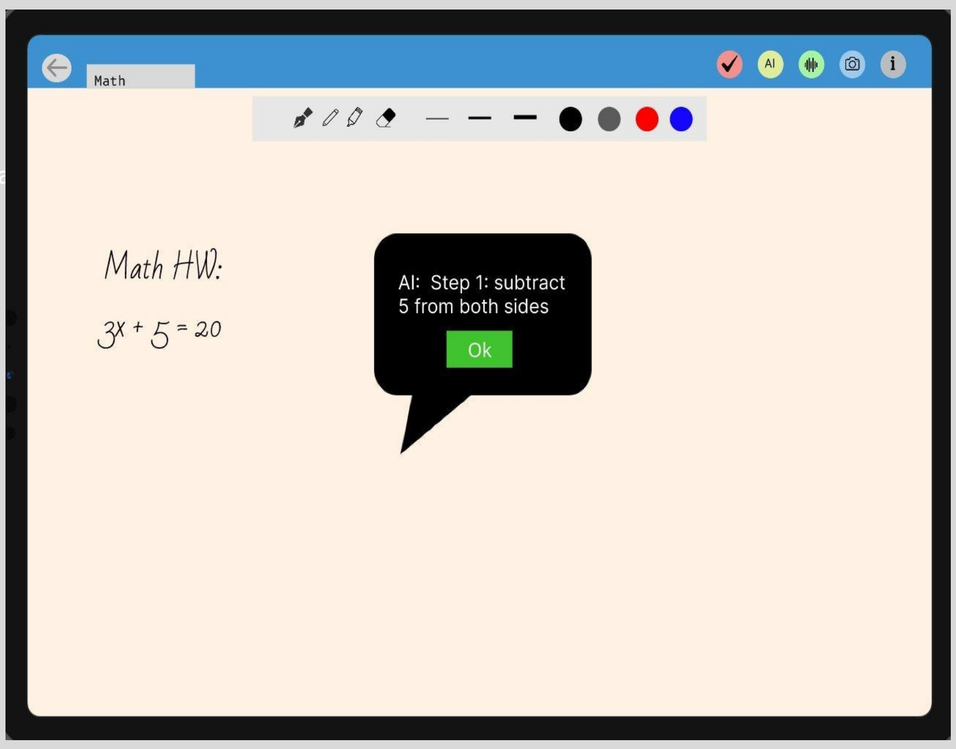
Most AI tools hand over instant answers, bypassing critical thinking and replacing human effort. In education, students skip reasoning entirely. Our research revealed: students want help, but don't want to lose control of their thinking.

→

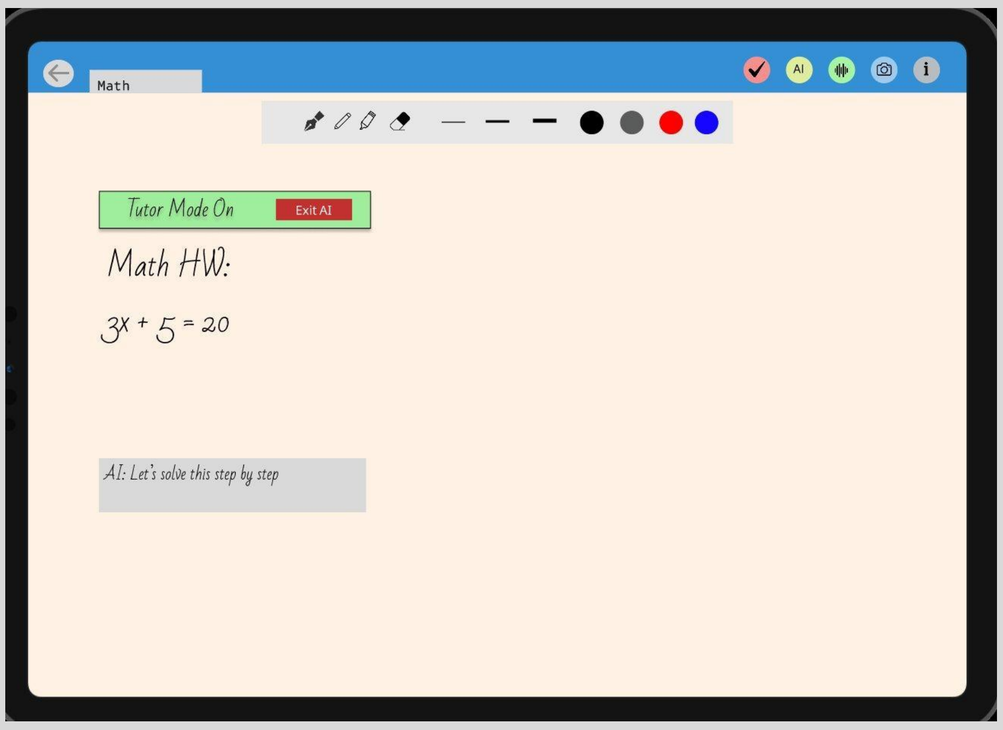
THE SOLUTION

ThoughtAI withholds full solutions until students demonstrate active thinking. Progress is earned through visible reasoning and guided prompts. AI responds with hints, questions, and feedback, not answers. A Socratic tutor, not a shortcut.

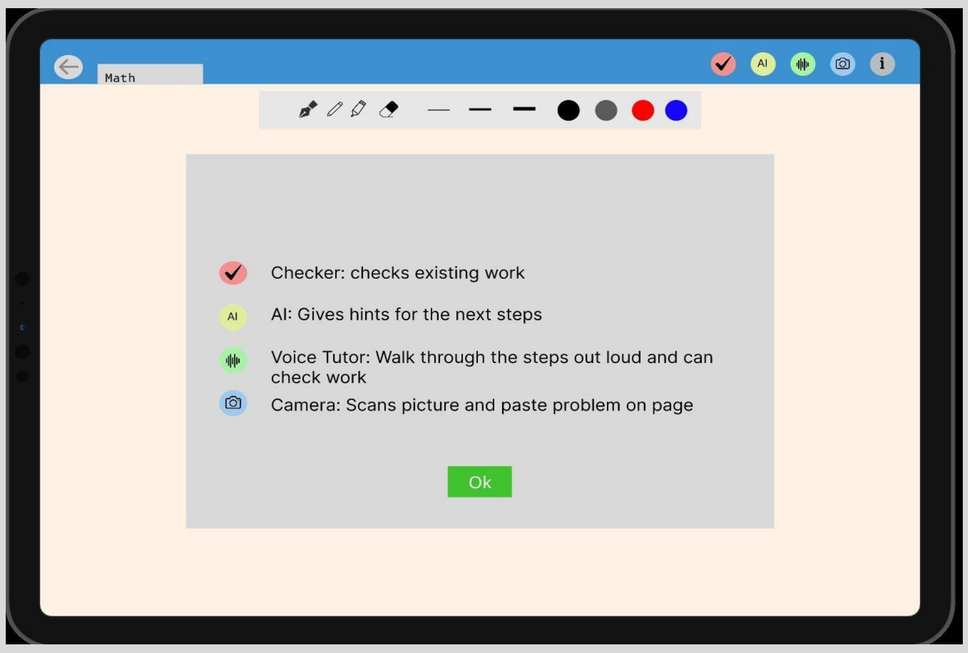
KEY FEATURES



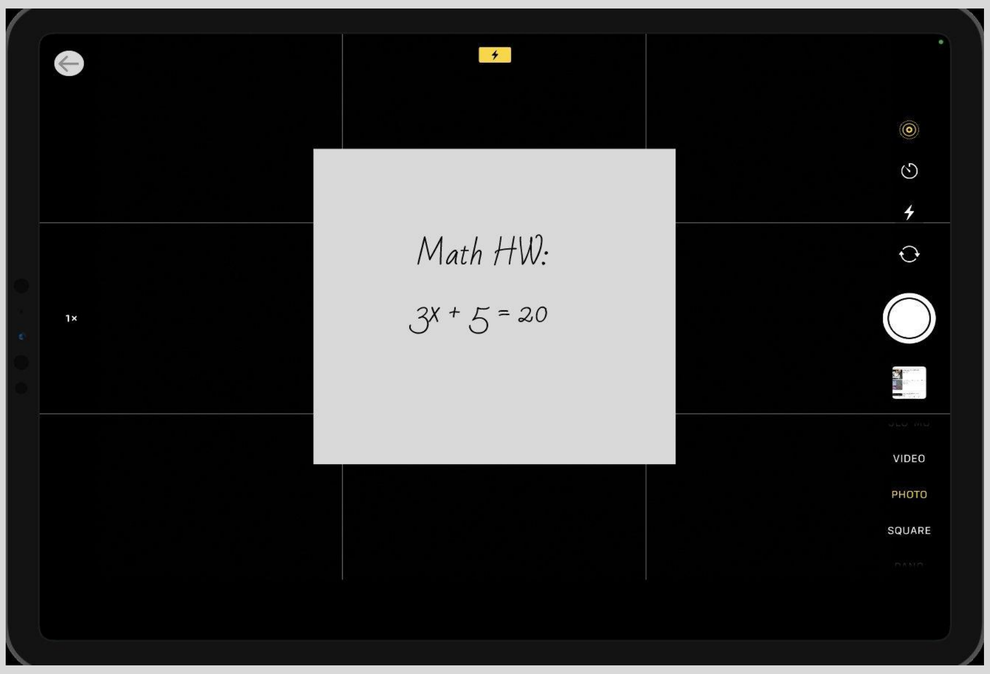
✓ Checker: Checks your existing work.



AI Hints: Gives guided hints for the next steps.

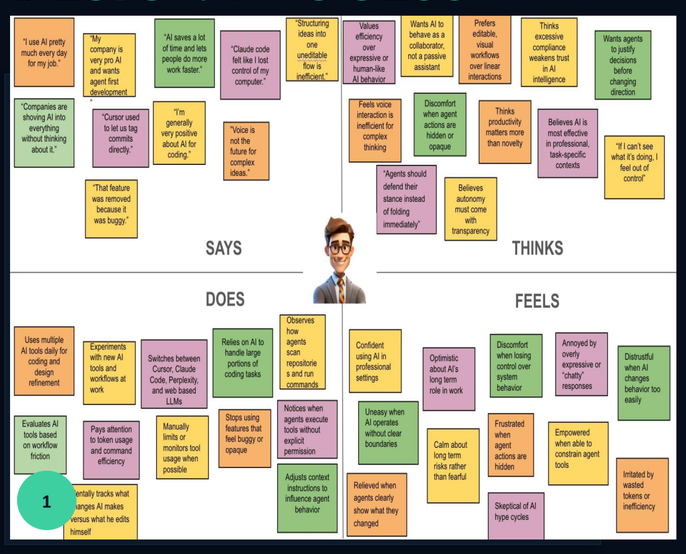


🎙️ Voice Tutor: Walk through steps out loud & check work.



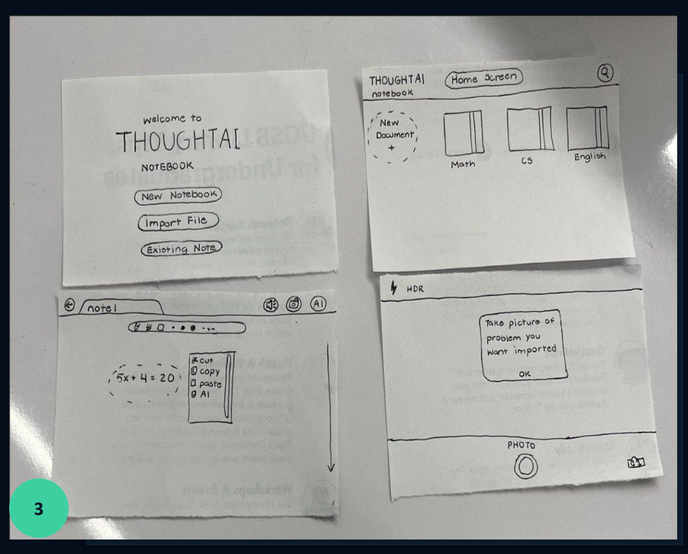
📸 Camera: Scans and pastes problem directly on page.

DESIGN PROCESS

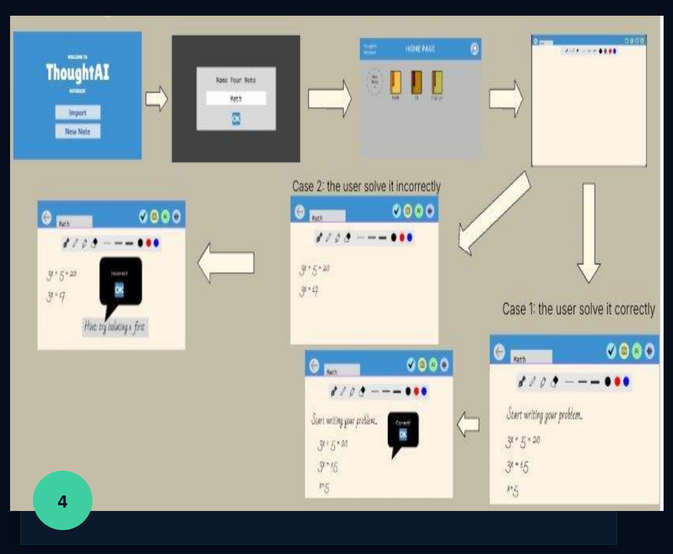


1 Needfinding

2 User Testing



3 Low-Fi Prototype



4 Med-Fi Prototype
